Case Study: Plymouth Marble & Granite LLC

“I just bought this building and this has been the easiest project on my list so far, the machine shop looks cleaner than ever. I couldn’t be happier with the lights.”

- Sen Tran, owner of Plymouth Marble & Granite

OPPORTUNITY

Plymouth Marble & Granite LLC is a family owned business with over 10 years’ experience in the stone industry. Located in Plymouth, Massachusetts, the company serves customers throughout the Eastern and South Shore of Massachusetts, Cape Cod, the Islands, and Rhode Island. The facility, comprised of an office space, warehouse, showrooms, and other secondary spaces totaling over 13,000 sq. feet had an opportunity to significantly reduce energy consumption while improving the overall quality of space. To pursue an energy savings project, Plymouth Marble & Granite, was looking to partner with an energy service provider who could offer a solution for the outdated interior and exterior lighting, and assist with various aspects of the program.

SOLUTION

Energy Source, located in Providence, Rhode Island, connected with the owner of Plymouth Marble and Granite, to provide a comprehensive turnkey solution for energy savings. Partnering with Eversource Energy for utility incentive management, Energy Source assisted with several aspects of the program including scope development, project management and completing the project on time and within the budget. Plymouth Marble & Granite received over \$20,000 in utility incentives, reducing the project costs by 50% to achieve a payback period of under 2 years. The installation of LED technology will generate substantial energy savings for Plymouth Marble & Granite without paying any upfront costs.
